rudderstack

Reliable at any scale

RudderStack Event Stream is battle-tested by over 5,000 organizations

Proven to perform under pressure

Extreme scalability

Supports peak loads of 1M+ events per second

Proven reliability

Processes 100B+ events per month across thousands of customers

Real-time performance

Optimized for low latency, even at scale

Engineered for reliability

Horizontally scalable

RudderStack scales horizontally to efficiently handle spikes in data volume

Fault-tolerant

Our three-queue event routing system ensures deliverability

State-driven processing

Our state machine systematically ensures correct event processing

> RudderStack is extremely efficient. We process 125 million daily user events and can easily scale to handle twice that capacity with our current configuration. Unlimited event tracking has given us room to grow.
