**rudderstack**

A groundbreaking approach to customer 360

RudderStack Profiles solves identity resolution at the root so you can create value faster

Power your business with reliable, complete customer profiles

Increase revenue

Ship key projects like personalization and recommendations faster

Reduce costs

Spend resources on projects that move the needle, not on integration and maintenance

Build trust

Use clean, reliable, first-party data to build complete profiles in your warehouse

Solve identity resolution at the root

Identity graph

Map unique identifiers to a single user record without writing complex SQL

User features

Rapidly develop and update user features on new data and existing models

Customer 360

Unify all of your customer data into a single source of truth for every tool and team

Data apps

Deploy data apps on top of your customer 360 to rapidly ship high-ROI use cases

> RudderStack Profiles supercharged our ability to identify our customers as they moved between our apps and online storefronts, creating a richer, more complete customer journey.
